DETAILED ACTION

Claims 1-60 are pending in this application.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-60, drawn to compounds and methods of use wherein G or W is -CN, -CHO, halogen, phenoxy, phenyl, (phenyl)C1-6 alkylene-O-, -C-(=O)Rx, -C(OH)RxRy, C1-8 alkyl, C1-8 cycloalkyl, or -NRxRy, piperidine, pyridine, imidazole, benzimidazole, pyrrolidine, pyrrole, and tetrazole, substituted as defined, and Rx and Ry are as defined except that the heterocycles included for Rx and Ry are limited to piperidine, pyridine, imidazole, benzimidazole, pyrrolidine, pyrrole, and tetrazole, substituted as defined. All other variables are as defined, classified in class 546 subclass 184+.
- II. Claims 1-60, drawn to compounds and methods of use wherein G or W is piperazine and morpholine, substituted as defined. All other variables are as defined, classified in class 544 subclass 63+.
- III. Claims 1-60, drawn to compounds and methods of use wherein G or W is diazepane and azepane, substituted as defined. All other variables are as defined, classified in class 484+.

If Applicant wishes to elect compounds wherein G or W is a moiety that is not represented by any of the groups above, a specifically disclosed species should be elected from which the Examiner would then build a generic concept.

Art Unit: 1626

The inventions are distinct, each from the other because of the following reasons:

The inventions are independent and distinct because there is no patentable co-action between the groups and a reference anticipating one member will not render another obvious. Each group is directed to art recognized divergent compounds which require different searching strategies for each compound. Moreover, the Examiner must perform a commercial database search on the subject matter of each group in addition to a paper search, which is quite burdensome to the examiner.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
